Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Request for Continued Examination

The request filed on 9/11/06 for a Request for Continued Examination (RCE) under 37 CFR 1.114 is acceptable and an RCE has been established. An action on the RCE follows.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 27 is rejected under 35 U.S.C. 102(e) as being anticipated by Ueda et al. (U.S. Patent No. 6,714,266).

Referring to figures 2a-3d, Ueda et al. teaches a method of fabricating a contact line structure for a liquid crystal display device, comprising:

forming a metal material (17, Aluminum or tungsten) on an array substrate (1);

Art Unit: 2813

forming a metal line (17, see figure 3c) on an array substrate by etching (patterning) the metal line (see figure 3c, col. 7, lines 11-16);

forming a silicide layer (18, see figure 3c) on the metal line direct contact (see col. 7, lines 1-20) with substantially an entire surface (top surface) of the metal line (17) and the silicide layer (18) is formed in a different layer from the metal line (see figure 3c);

forming an insulating layer (9, see figure 3d) having a contact hole exposing a first portion of the silicide layer, and

forming a transparent conducting terminal (19, ITO, see figure 3D) in and on the contact hole,

wherein the insulating layer (9) is adjacent to the contact hole (see figure 3d).

Allowable Subject Matter

Claims 9-22 are allowed. Because none of the prior art alone or in combination teaches or suggests the particular subset of the process steps in forming a silicide layer on the metal line in direct contact with upper and side surfaces of the metal line.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thanh Nguyen whose telephone number is (571) 272-1695, or by Email via address Thanh.Nguyen@uspto.gov. The examiner can normally be reached on Monday-Thursday from 6:00AM to 3:30PM.
